

OSA - 4427-66.

OW 6744
Approvals

10 NOV 1966

SUBJECT: RCD Chemistry Study, Contract CW-6744

Dear Nat,

Reference is made to your 12 September 1966 proposal, AKP-I-5458, to study alternate RCD chemistry which would be compatible with vehicle materials.

We approve your proposed study but request you limit your effort to eighteen equivalent man-months. We further request that you not begin investigating new pretreat, activator, or rinse chemistry until you have found a fully satisfactory fixing agent.

As you suggest, monthly reports on your progress are necessary. Also, we want you to keep Rus fully informed of your efforts on this study.

Regards,

Carl
